

# The process of creating a page

## 1st Step: Wireframe

A wireframe is like a picture draft for a webpage. It helps decide where everything goes

## 2nd Step: Styleguide

A style guide is like a rulebook for your webpage's.

It shows you which colors, fonts, and design elements to use to make your webpage

look awesome and consistent

## 3rd Step: Bootstrap

Finally, using bootstrap we can see how the page is going to look like. Is the result of joining the previous steps
